

# Responsibilities Relating to the IVB Process

Key responsibilities of the IVB process stakeholders

## **1: Duty Holder**

Holds ultimate accountability for the safe operation of the asset.

## **2: Independent Verification Body**

Reviews documentation and carries out examinations of equipment. When all verification requirements have been met the IVB issues a statement of suitability to the duty holder.

## **3: Verification Coordinator**

This is Project point of contact for all matters IVB with functional report to the duty holder. Essentially, the coordinator manages all things IVB on behalf of the project.

## **4: Engineering Contractor, Subcontractors & Suppliers**

Required to cooperate with other IVB stakeholders by providing documentation, Inspection Test plans and access to facilities for witnessing of testing of equipment.
