SLUGCATCHER

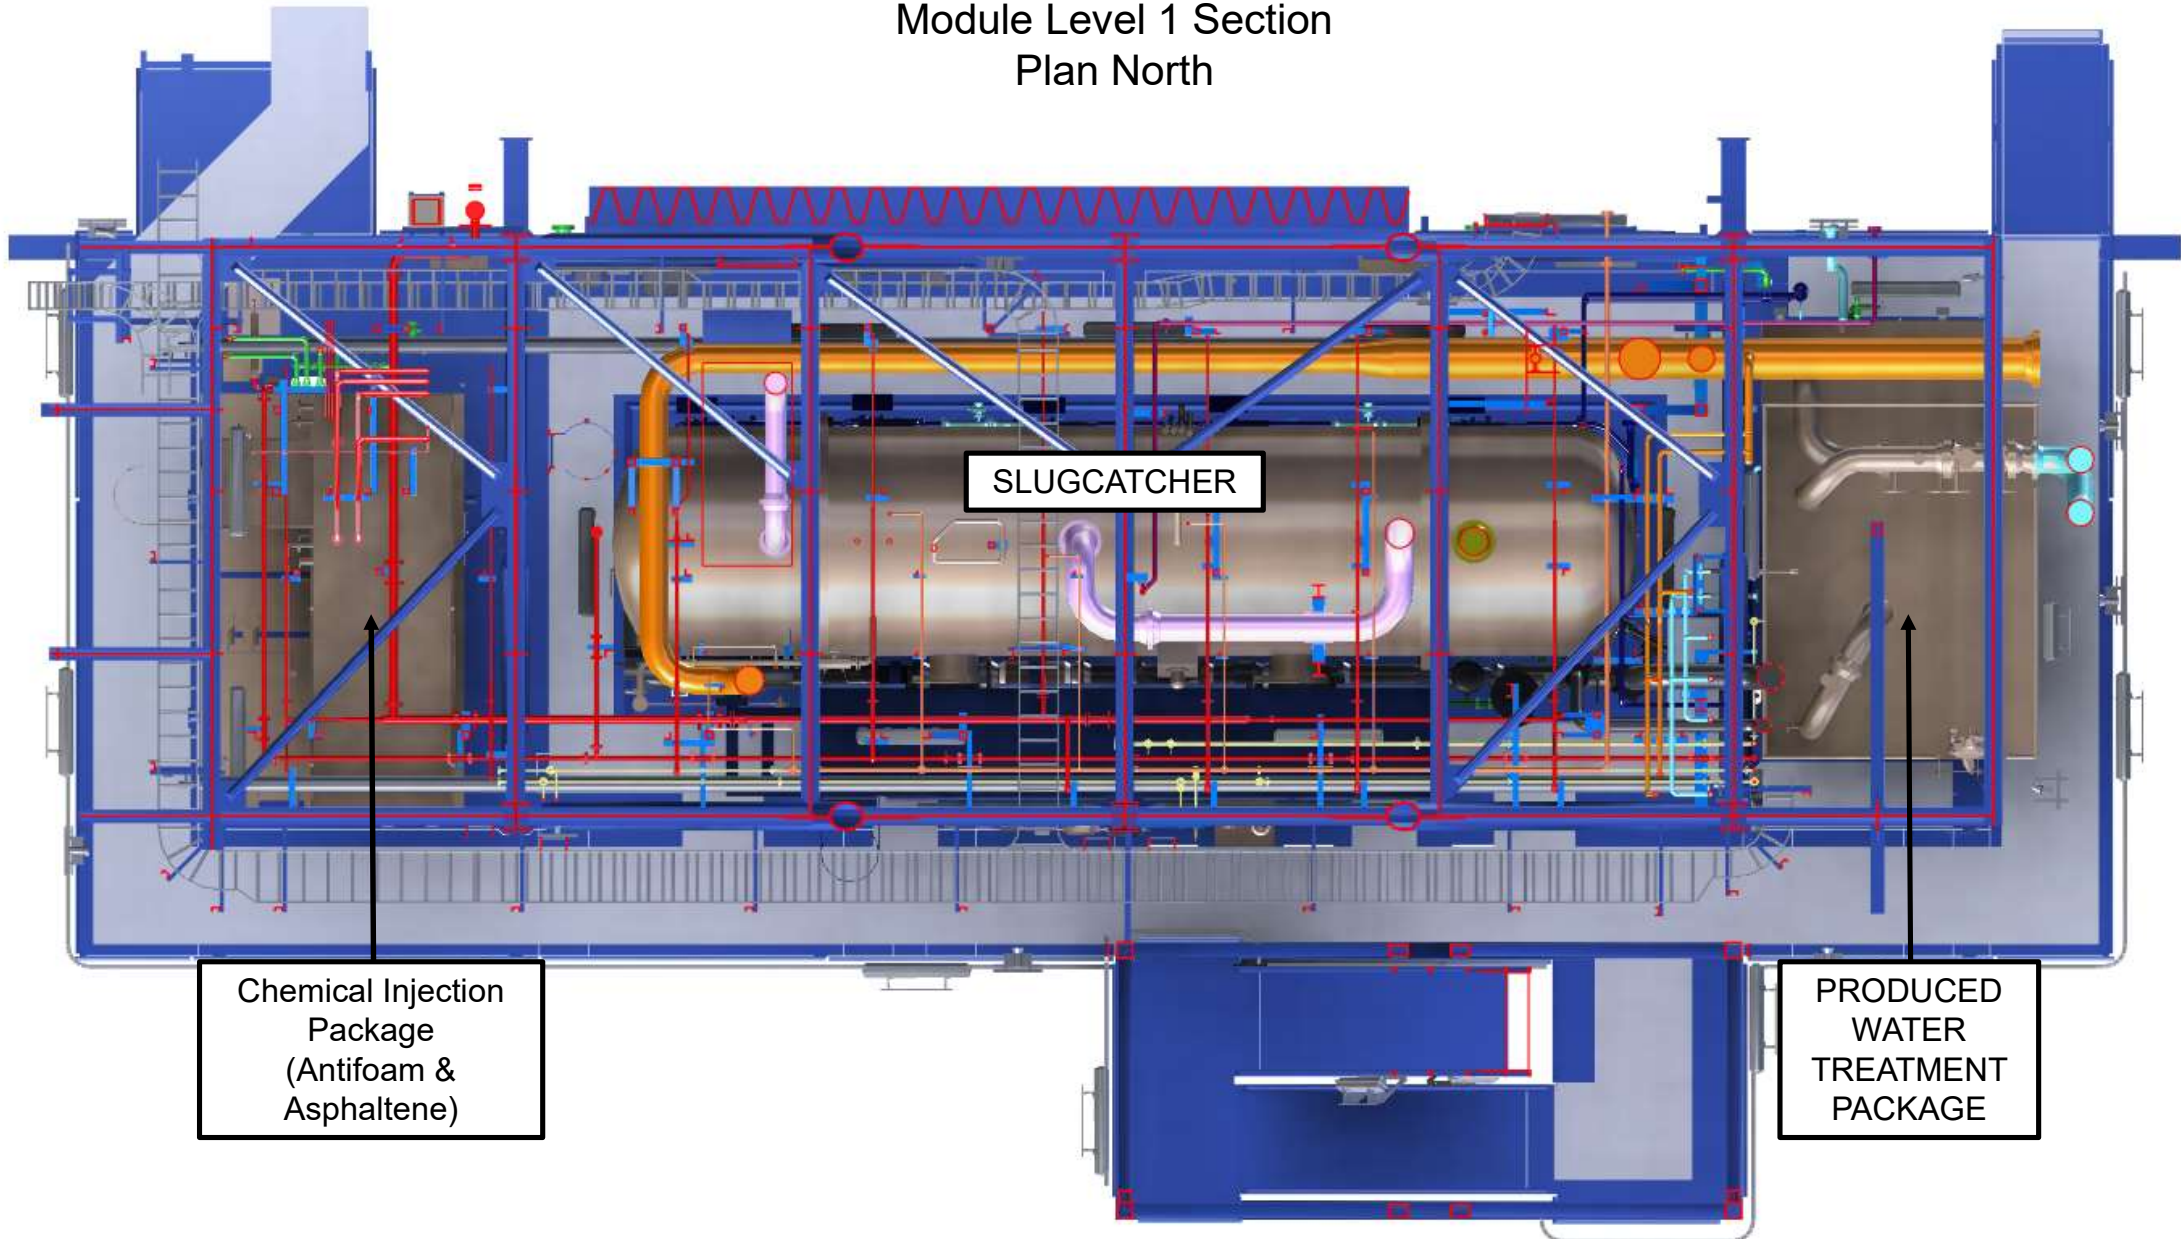

A 3D CAD model of an industrial module, specifically Level 1. The structure is a complex steel framework painted blue, featuring multiple levels of walkways, ladders, and platforms. A network of green pipes is routed throughout the structure, with some sections highlighted in yellow. Three red arrows point from text labels to specific components: one to a slugcatcher, one to a chemical injection package, and one to a produced water treatment package. The entire unit is supported by a base structure.

MODULE INSTALLATION
GUIDES

This 3D CAD model illustrates the proposed installation of new bumper bars and pipe rack modifications. The new structures are highlighted in red and yellow, contrasting with the existing grey industrial infrastructure. The view is from an elevated perspective looking towards the northeast. Two callout boxes with arrows point to specific components: 'MODULE INSTALLATION GUIDES' points to a horizontal red beam, and 'EXISTING PIPE RACK MODS' points to a vertical yellow support structure.
