

Step Change in Safety is a member-led organisation that aims to make the UK the safest place to work in the worldwide oil and gas industry.

They/we believe that by collaborating, sharing and adopting best practices we will improve the safety of the UKCS.

Step Change in Safety is a not-for-profit, member-led organisation which aims to make the UK the safest oil province in the world to work in.

Safety cannot be left to C-suite executives alone. It requires collaboration from everyone. This is why Step Change in Safety brings together operators and contractors, trade unions, regulators and the onshore and offshore workforce.

Step Change in Safety was founded in 1997 by the oil and gas industry trade associations. The original aim was to reduce the UK offshore injury rate by 50%.

Although a UK based organisation the principles and practices have global application.
